

What is claimed is:

1. An instrument for contemplation comprising:

a medium capable of displaying a character;

a main unit that is provided on the medium, the main unit including a subject displaying cell that displays a subject, and a plurality of thought results displaying cells that are positioned in visual connection with the main unit and that display a plurality of thought results found from the subject; and

a sub unit that is provided on the medium in visual connection with the main unit, the sub unit including a new subject displaying cell that displays one of the thought results as a new subject, and a plurality of new thought results displaying cells that are positioned in visual connection with the new subject displaying cell and that display a plurality of new thought results found from the new subject.

2. An instrument for contemplation as set forth in claim 1, wherein the medium includes a paper that is capable of being printed the main unit and the sub unit, and

the instrument for contemplation further comprises a bending portion used for bending the paper at the boundary between the main unit and the sub unit, and a cutting portion used for cutting a part of the paper at the boundary between a sub unit and another sub unit adjacent thereto.

3. An instrument for contemplation as set forth in claim 2, wherein

the back of the paper is printed a supplementary cell for one of a thought result displaying cell in the main unit and a new thought result displaying cell in the sub unit.

4. An instrument for contemplation comprising:

a medium capable of displaying a character;

a subject displaying cell that is provided on the medium, the subject displaying cell displaying a subject;

a thought unit that is provided on the medium, the thought unit including a plurality of thought result displaying cells that display a plurality of thought results found from the subject; and

a plurality of selecting units that are provided on the medium, the plurality of selecting units displaying a predetermined number of thought results selected among the thought results displayed in the thought unit,

wherein each selecting unit includes an upper selecting unit that displays the thought results selected among the thought results displayed in the thought unit, and a lower selecting unit that displays a plurality of thought results selected among the thought results displayed in the upper selecting unit.

5. An instrument for contemplation as set forth in claim 4, wherein

the thought unit is divided into a plurality of sub thought units that

the contents sorting unit includes a totaling cell that displays the plurality of thought results that are given the evaluation marks prepared by the participants in such a fashion that the plurality of thought results are sorted by contents, and that displays the total of the evaluation marks corresponding to a plurality of thought results sorted in the same classification.

a subject displaying cell that is shown on the display of the computer,
the subject displaying cell displaying a subject;

a plurality of selecting units that are shown on the display of the computer, the plurality of selecting units displaying a predetermined number of thought results selected among the thought results displayed in the thought unit, each selecting unit including an upper selecting unit that displays the thought results selected among the thought results displayed in the thought unit, and a lower selecting unit that displays a plurality of thought results selected among the thought results displayed in the upper

selecting unit,

wherein the units are shown on the display of the computer used by the participant in a predetermined order.
